

emom ap

emomap

project that helps people to keep
journal their emotional states while
they take the pictures.

from the photographs :

- time
- place
- journey

from the photographs :

- time
- place
- journey
- emotional data

purpose :

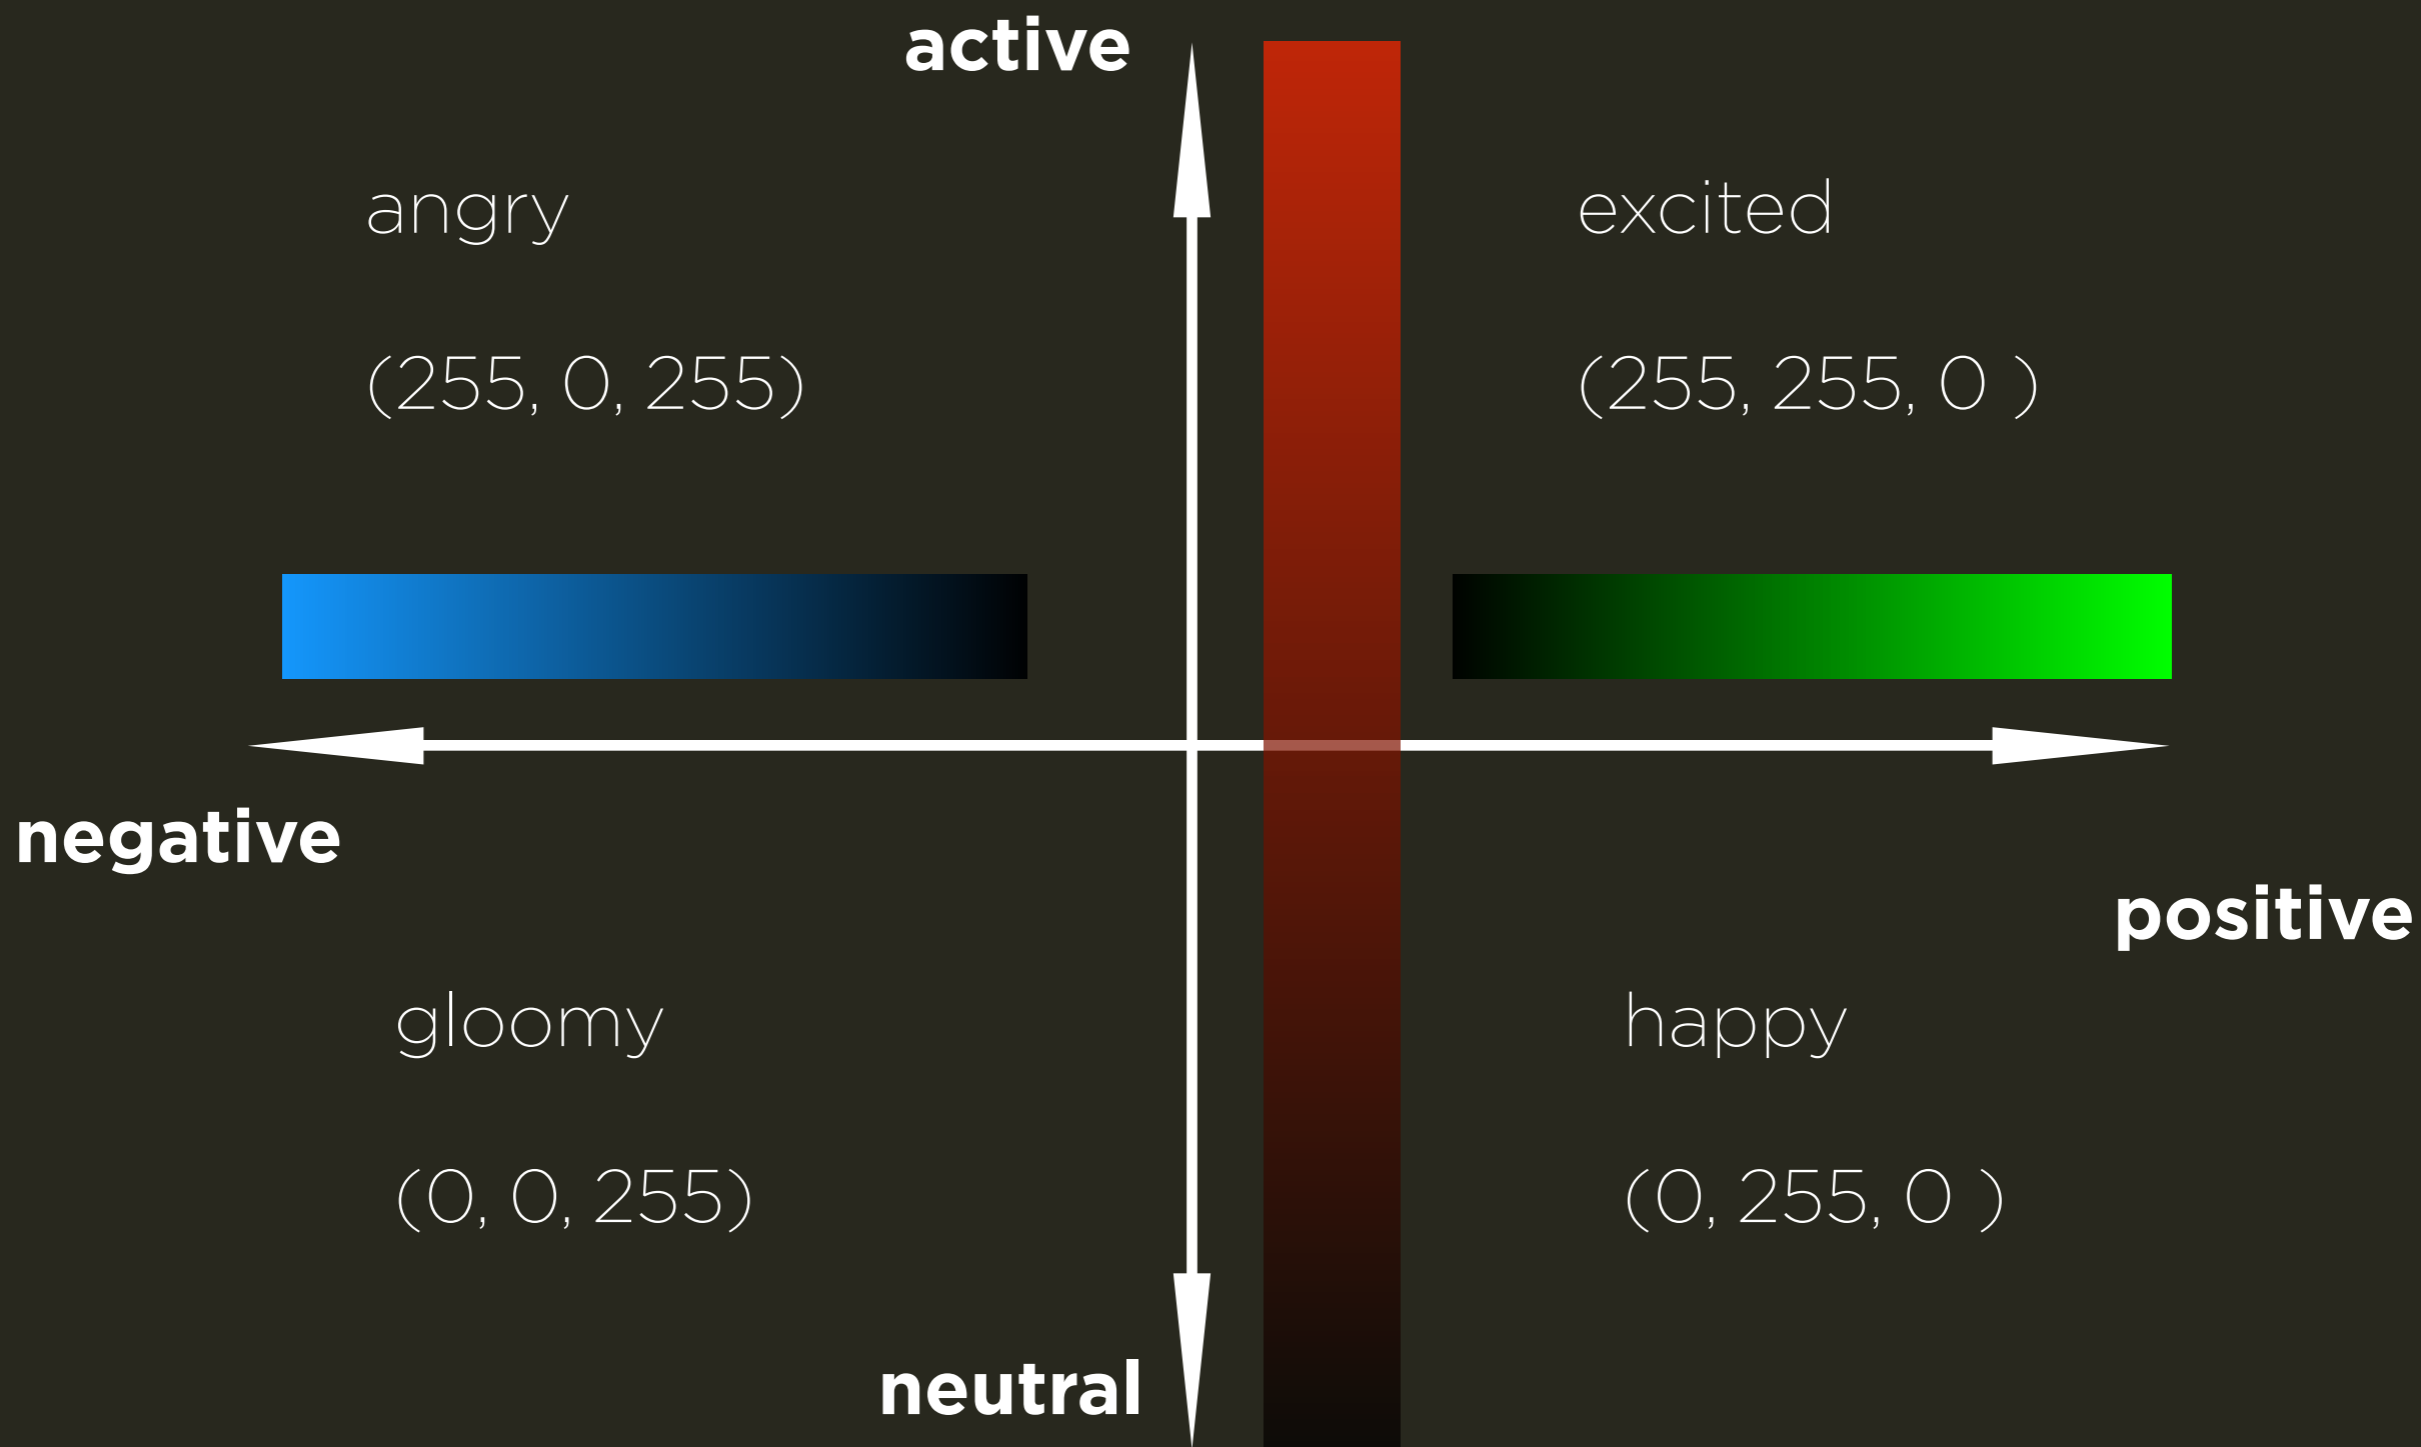

- keep track of myself
- fulfill the purpose of the photographs

what we got from the device :

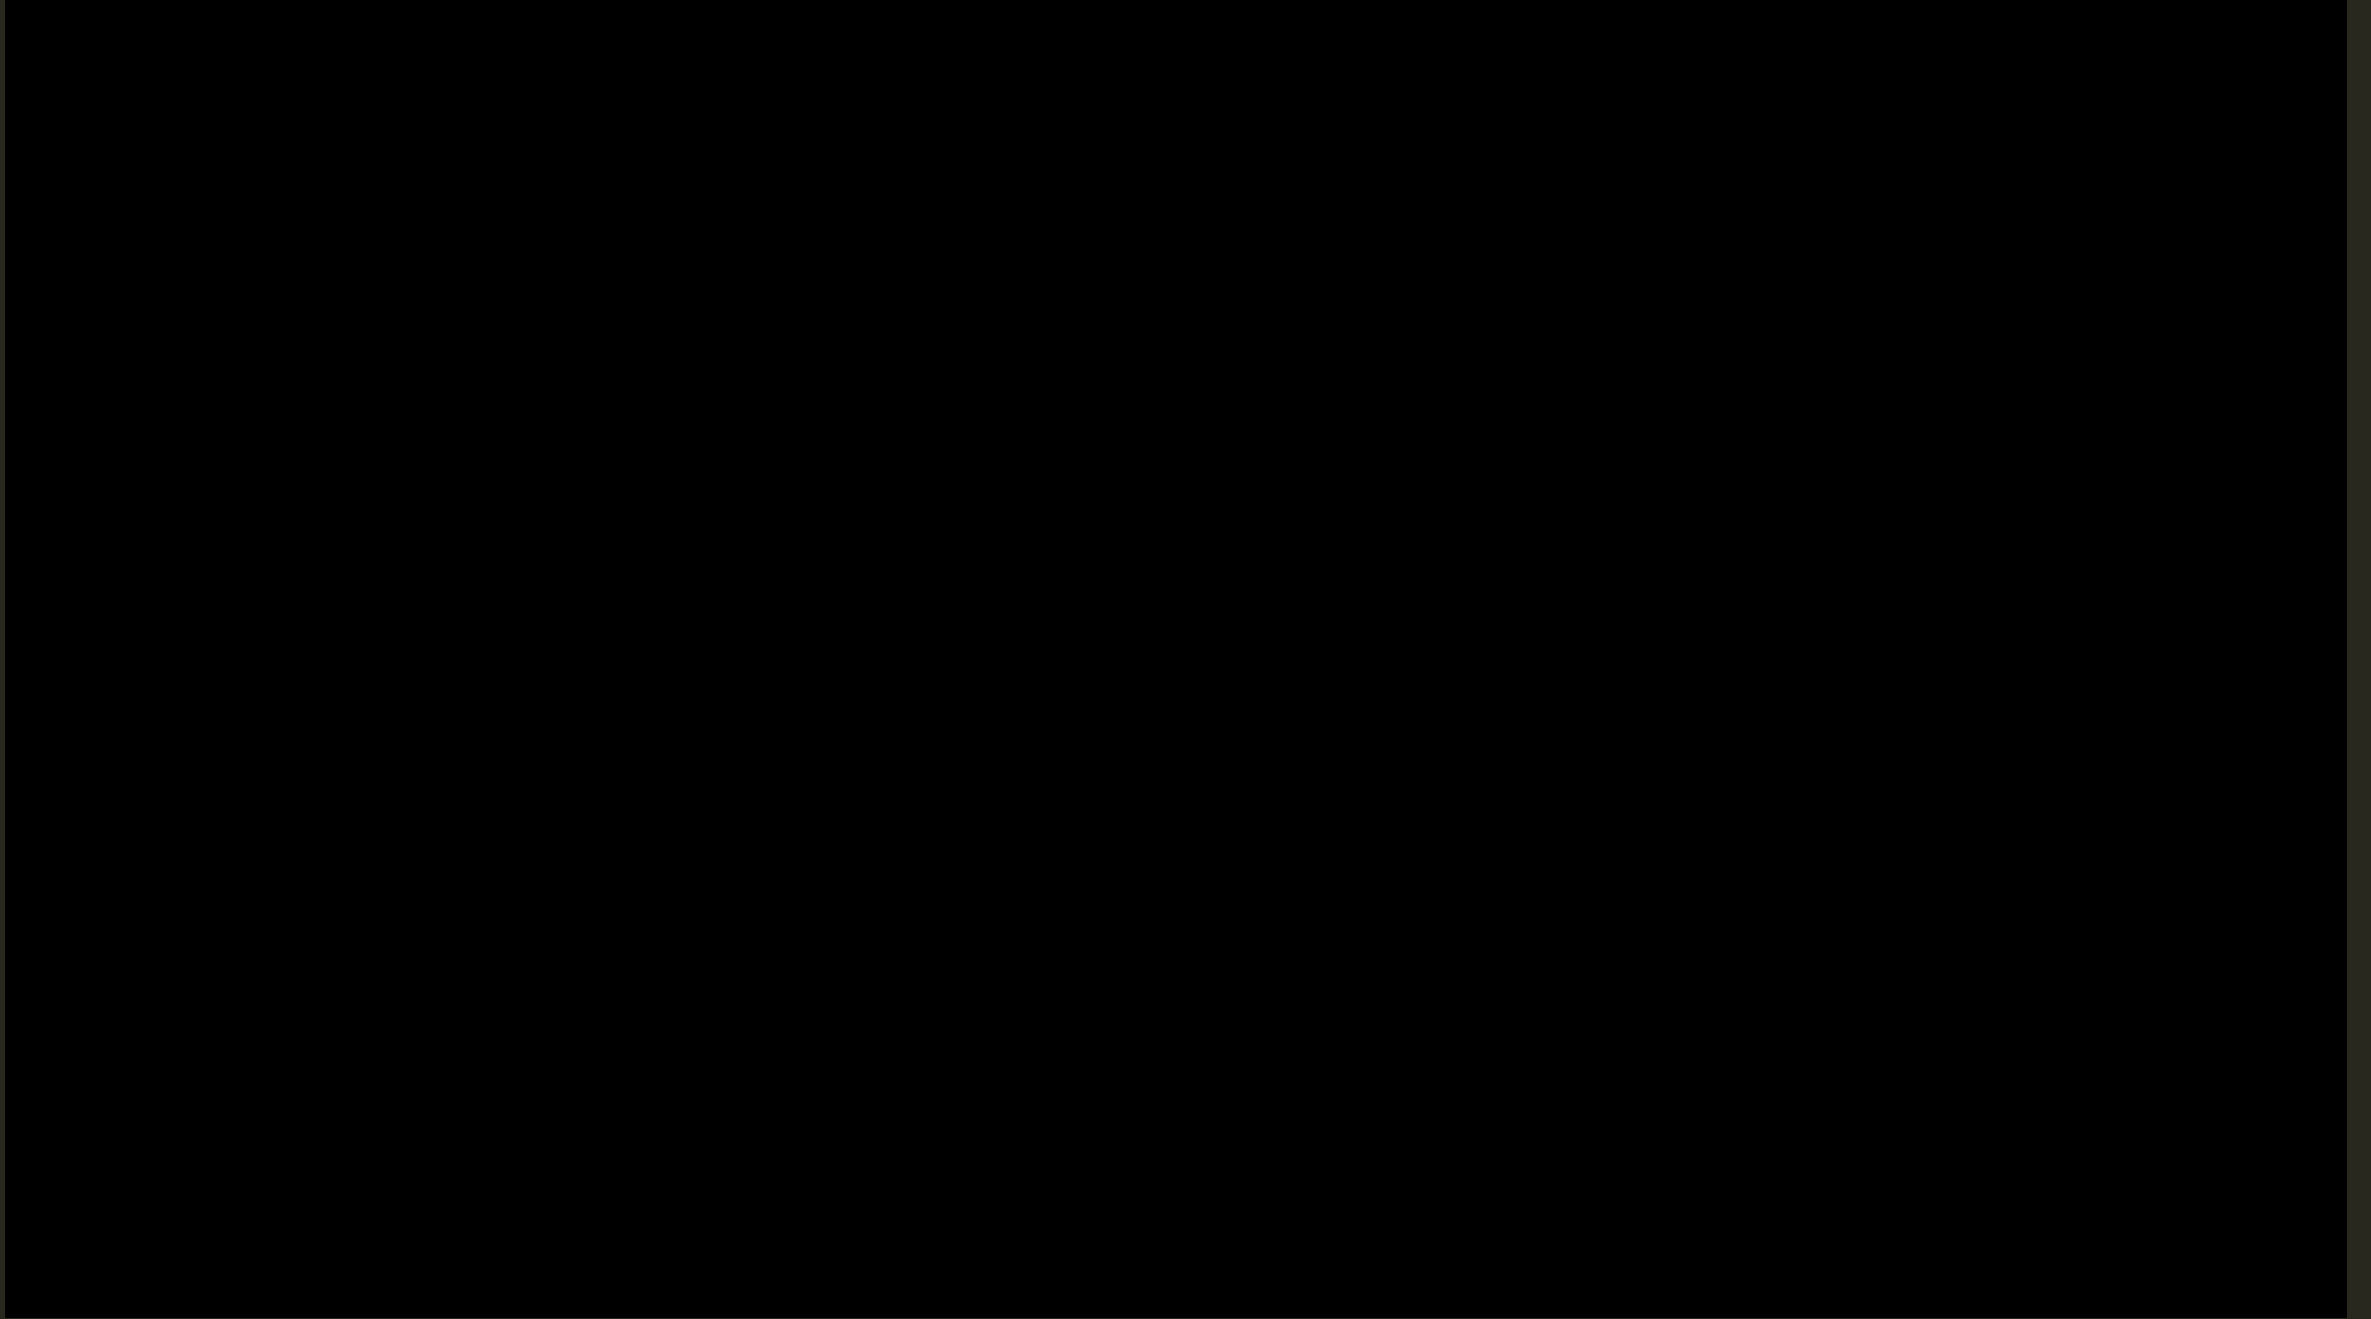

- photographs (that has taken at that moment)
- facial data
- GPS data

how we determine emotional status:

- value of eyebrow height
 - amount of changes from normal eyebrow height: **activeness**
 - increase or decrease of value will be determined as positive or negative state of emotion
- mouth height : **activeness**

user test:

how it works:
