ITP'S FACULTY NEWEST INSTALLATION: DATA PORTRAITS!

This latest installation by John Henry Thompson represents a continuing engagement with some of the seminal work of one of the most important figures in American History - W. E. B. Du Bois. The installation juxtaposes two visually stirring pieces of Du Bois's presentation at the 1900 Paris Exposition. The purpose of the Paris Exposition (also called the World Fair) was to celebrate and highlight advances in technology and culture made by countries around the world - predominantly Western countries.

- **You can check this installation out at 370 Jay Street on the 4th Floor!**

Design & Innovation: Ideation with Natalie Kuhn, Head of Enterprise Services Risk at Capital One

During this session, we will discuss and practice how to use maps to understand problems and come up with ideas to solve them. Specifically, we will focus on creating and using Experience Maps and Service Blueprints. We will touch on how these tools are an output of research and collaboration, but the emphasis will be on how to use them to come up with and prioritize ideas. Participants will have a chance to get hands-on experience through collaborative exercises, learn about our guest's professional journeys, and ask questions.

THE BUILDERS ASSOCIATION: I AGREE TO THE TERMS

I Agree To The Terms is a new virtual performance developed by the OBIE Award-winning ensemble The Builders Association. The interactive online event is being created with a community of Amazon "microworkers" who train the algorithms that shape our online experience. MTurk workers earn from \$1 to \$100 a day in a vast, unregulated industry. Their assignments are repetitive, boring, maddening, and sometimes disturbing.

- **March 25th - April 3rd**
- **Tickets \$15.00**
